TECH QUEEN™
On The Move
COLLECTION

techqueenshop.com

Courtney Woods, the Owner and Master Promotional Website Designer of PC Media Techs, is excited to announce the launch of TechQueenShop.com, a new innovative collection for tech queens, girl bosses, and boss ladies. All of the collection line items are innovatively designed for individuals that occasionally work on the go or have on-the-move lifestyles.

The Tech Queen® On The Move Collection was birthed from a combination of 10 years of experience in UX/UI website design, having to carry around business and tech necessities, beauty care products, and other essentials when working on the go or traveling. This resulted in frequent sharp pains that would shoot from the creator of the collection's shoulder blade down to her lower back. She made a decision to start taking the possible...

... risks of long-term effects more seriously. This led to Courtney wanting to help others to be proactive by choosing to be more preventative.

No matter if we're working on the go and have to tote around laptops and business necessities or if we have a passion to travel for leisure with loved ones or for work purposes, we need to be preventative when toting these necessities, essentials, and toiletries.

Collection items at TheTechQueenShop.com include a series of functional and stylish products to enhance your on-the-move lifestyle and travel journeys. Line items range from roller bags with portable detachable tripod phone mounts to Oversized Wrist Totes that help you compartmentalize tech and business essentials as well as women's necessities and toiletries.

When coupled with the On The Move Roller Bag, the Detachable Phone Stand is used for on-the-go content creation, virtual meetings, and capturing moments hands-free. The universal Detachable Phone stand acts as both a tripod and phone mount and works with most iPhone and Android devices.

Each collection line item has been meticulously designed to meet the needs of both travelers and on-the-go lifestylers with a focus on functionality, quality, comfort, and style! Unlike similar tech bags on the market, the Oversized Wrist Tote allows you to compartmentalize tech and business essentials as well as women's necessities and toiletries.

"I'm thrilled to launch The Tech Queen® On The Move Collection," says Courtney Woods. "As a website designer, I'm always thinking about how services and processes can be improved to better serve visitors and clients. With the Tech Queen® On The Move Collection, I applied the same principles, creating products that are not only beautiful but also highly functional and user-friendly." TechQueenShop.com has already received rave reviews for the collection items' thoughtful and stylish design, as well as its functionality.

The collection is receiving attention from media outlets, including LookWeAreIncluded.com, [ICUMedia](http://ICUMedia.com), and other [Entrepreneurs](http://Entrepreneurs.com). "I'm proud to have created a collection that is receiving such positive feedback for helping people be more preventative," says Courtney Woods. "My goal was to create an innovative and proactive product for women working on the go. It's wonderful to see that people find pleasure in using it as much as I do!" Courtney has been designing websites for 10 years, with a focus on creating user-centered services (and now products) that are both visually stylish, user-friendly, and functional.
